ALL-NEW 2026 CAN-AM OUTLANDER ELECTRIC LAUNCHED

The 2026 Can-Am Outlander Electric delivers 47hp and 53lb ft of torque (image credit Mervyn Bailey).

BRP has launched the all-new 2026 Can-Am Outlander Electric.

“At BRP, our approach to electrification is intentional and strategic – we electrify where it makes business sense and adds real value to customers,” said José Boisjoli, president and CEO of BRP. “The Outlander Electric is a powerful, quiet, and capable ATV that reflects our commitment to innovation and sustainability. This is another important step in our journey to play a leadership role in this technological evolution and to bolster our offering with completely new experiences, electrified with our very own technology.”

The 2026 Can-Am Outlander Electric delivers 47hp and 53lb ft of torque, with up to 80km (50 miles) of range in optimal conditions. It features instant throttle responses, selectable ride modes (Normal, Sport, Work) and charges from 20 to 80% in 50 minutes using a Level 2 charger.

Outfitted with electric power, noise-reducing XPS Recon Force tyres, optimised suspension, and a low-noise cooling system, the new

“The Outlander Electric is a powerful, quiet, and capable ATV,” says José Boisjoli, president and CEO of BRP (image credit Mervyn Bailey).

model is said to have a smooth riding experience while still delivering 830kg of towing capacity.

“With the Outlander Electric, we’re not just launching a new ATV, we’re introducing a new way to experience the outdoors and get the job done,” added Julie Tourville,

director, global marketing, Can-Am Off-Road at BRP. “This vehicle is built to let riders and workers feel more connected to their surroundings.

“It’s powerful, quiet, and true to what we do at BRP. It shows how we bring purposeful innovation to life.”

TRACTOR WORLD SHOW 2026: SAVE THE DATE!

The Tractor World Show returns to Malvern's Three Counties Showground on Saturday 21st and Sunday 22nd February 2026.

This year, as well as the regular historic farm machinery and agricultural exhibits, they'll be hundreds of vintage, veteran, classic and brand-new tractors, alongside classic commercials, lorries, trucks, Land Rovers, vans and stationary engines.

Visitors can look forward to new themes, anniversaries and celebrations including: The Friends of Ferguson Heritage and the Ferguson Club who are bringing examples of these iconic machines to mark 80 years of the Ferguson TE20 and 70 years of the FE35.

2026 is also cause for celebration for Case IH Club who are marking 70 years of the Bradford Built small tractor, also on display for enthusiasts.

The Tractor World Show will be taking place on Saturday 21st and Sunday 22nd February 2026 at Malvern's Three Counties Showground.

H J Pugh's live auction, featuring over 1,000 lots, will be taking place on Saturday 21st at the Tractor World Show.

Saturday kicks off with the renowned H J Pugh's live auction, featuring over 1,000 lots and Sunday welcomes the Classic Commercial Drive-in Day and Outdoor Vintage Autojumble, dedicated to strictly second-hand motoring memorabilia.

With more areas available for free parking, disabled access, weekend camping, and plenty of places to refuel, including a heated

restaurant, coffee lounge and outdoor food stands, visitors and exhibitors alike can enjoy the show comfortably, whatever the weather. Just follow the brown tourism signs and AA signs.

Pre-booked tickets are discounted. Camping slots are limited must be pre-booked. Go to www.tractorworldshow.co.uk for tickets, bookings, information and application forms.

BAGMA LAUNCHES ITS LATEST TRAINING COURSE

The British Agricultural and Garden Machinery Association (BAGMA) has announced the launch of its latest training course, Safety Essentials for Technicians - OHEV & Electric Outdoor Power Equipment, alongside the release of a complete 2026 training guide.

The new Safety Essentials for Technicians course addresses the growing demand for specialist knowledge as electrification accelerates within the industry. Designed for technicians, sales staff, delivery drivers, and workshop personnel, the one-day programme provides the essential skills to work safely with high-voltage off-highway electric vehicles (OHEVs) and electric outdoor power equipment (EOPE). Participants will gain practical experience in identifying hazards, following safe isolation procedures, and understanding the relevant UK legislation surrounding electric and hybrid machinery.

BAGMA's 2026 portfolio also includes a comprehensive mix of technical and business-focused training developed in conjunction with key industry partners, the Health & Safety Executive, dealers, manufacturers and other training industry bodies. Courses such as Handover and Install Products and Services to Customers to provide dealer and manufacturer staff with the confidence to perform machinery installations safely and professionally.

Training dates for this course have been released, with additional dates to follow, and can be found via www.bagma.com.

Meanwhile, the Thorough Examination of Machinery and Equipment for Serviceability (LOLER) course equips technicians with in-depth knowledge of inspection procedures

and legal compliance under LOLER 98 and PUWER 98, assessed through the BAGMA / CFTS accreditation process.

For those looking to enhance roadworthiness and compliance knowledge, the Agricultural Tractor Trailer Scheme (ATTS) delivers hands-on training covering both roadworthiness inspection and brake performance testing. Combining practical and classroom elements, the course is aimed at competent technicians seeking to strengthen their understanding of recognised vehicle roadworthiness criteria.

Now in its fourth year, BAGMA's Training for Businesses series, developed with the Agricultural Engineers Association (AEA), offers short focused courses on customer service, recruitment, staff management and business development. Topics include Customer Service - Raising the Bar, Presentation & Training Skills, Recruitment & Retention, Managing Staff for Performance and Profit from Shows & Demonstrations. Each course is designed to equip attendees with practical tools to address everyday challenges and improve overall business performance.

"Our training is designed by the industry, for the industry," said Nick Darking, general manager of BAGMA. "As technology evolves and new safety requirements emerge, we're ensuring that our members and their teams remain equipped with the knowledge, confidence, and accreditation to work safely and effectively."

To explore the BAGMA's 2026 training portfolio visit www.bagma.com or contact Kari Hearn directly via info@bagma.com.

CE MARKED STATUS APPROVED

CERTIFICATE 14/F121

Any manufacturer involved in fabricating structural steelwork, no matter how large or small the components are, will have to CE mark these products by 1st July 2014 if they are being sold within the European Union (EU).

We are proud to announce that we have achieved accreditation to the standard EN 1090-2:2008 +A1:2011

CLADCO PROFILES: SUPPLYING QUALITY ROOFING TO THE UK FOR OVER 50 YEARS

Cladco Profiles has said it is "proud" to have been supporting customers nationwide for over 50 years. It manufactures high-quality, cost-effective steel roofing sheets designed for use across various structures, including farms, smallholdings and rural properties. Available in a wide selection of colours, coatings and profiles, its sheets deliver long-term performance for both roofing and side cladding applications.

Cladco offers five versatile roofing profiles: 32/1000 box profile, 34/1000 box profile, 41/1000 tile form, 13/3 corrugated, and 30/500 standing seam. Manufactured from high-quality galvanised steel, its sheets provide strong resistance to rust and corrosion, ensuring low-maintenance protection in all weather conditions. For additional functionality, it also supplies insulated panels and GRP translucent roof lights. Prices start from £7.49 per metre (excluding VAT).

As showcased in this project pictured, the company's 32/1000 box profile PVC plastisol-coated roof sheets provide a strong, dependable solution for a wide range of agricultural buildings. Manufactured from premium galvanised steel and finished with a 200-micron leather-grain PVC plastisol coating, they offer resistance to weathering, abrasion and everyday wear. This durable finish typically provides 15-25 years before first maintenance is required, the company

says, with a lifespan exceeding 40 years in normal environments.

The 32/1000 profile features six rigid ribs with a 200mm pitch and 32mm depth, providing a full 1000mm cover width when lapped. This design ensures strong structural performance and effective water run-off, even on low-pitch roofs. Its wide spacing between profiles also makes it easier to clear leaves and debris from the roof when installed near trees.

For a fast, no-obligation quote, try Cladco Profiles' easy-to-use online roofing calculator at www.cladco.co.uk/calculator/roofing/. Simply enter your project details, select your profile, and let the calculator do the rest, helping you order the right amount of material for your build while minimising unnecessary waste.

Alongside its steel roofing sheets, Cladco supplies a complete range of fixings and accessories, including Dripstop anti-condensation membrane, flashings, purlins, screws and foam fillers. It also offers clearance sheets. Beyond roofing, Cladco is the UK's leading supplier of composite decking, cladding, and fencing, available at www.cladcodecking.co.uk.

For expert advice, contact Cladco's sales team on 01837 659901, Monday to Friday from 8am to 5pm, and Saturday from 8am to 1pm, or visit www.cladco.co.uk for more details.

Cladco 32/1000 box profile sheets in merlin grey PVC plastisol installed on stables in Devon.
